

## PERSON-CENTERED CARE PLANNING 2019

The Person-Centered Care Plan is a collaborative plan including the client, his or her significant others, decision makers for the client, as well as the treating clinicians. The underpinning of the Care Plan is the Initial Assessment coupled with the desires and objective of the client and the family.

Care Providers Oklahoma - 1201 North Harvey Avenue - Oklahoma City, OK 73103

**Join us for this 3-hour training program (offered a.m. or p.m.) to learn how to develop a person-centered care plan required by CMS for long-term care (LTC) facilities that wish to participate in Medicare and Medicaid programs.**

## **Person-Centered Care Planning**

- Facilities must develop a baseline care plan for each resident within 48 hours of their admission that includes care instructions.**
- A nurse aide, a member of the food and nutrition services staff and a social worker are required members of the interdisciplinary team that develops the person-centered care plan.**
- The plan must include any specialized services or specialized rehabilitation services the nursing facility will provide as a result of Preadmission Screening and Resident Review (PASARR) recommendations.**
- As required by the IMPACT Act, facilities must include discharge planning requirements for LTC facilities. The summary must include a reconciliation of all discharge medications with pre-admission medications (both prescribed and over-the-counter). The post-discharge plan of care should summarize what arrangements have been made for the resident's follow-up care and any post-discharge medical and non-medical services.**
