## 2019 RESTORATIVE NURSING TRAINING

Care Providers Oklahoma announces the 2019 Restorative Nursing Training program to train the Restorative Nurse Aide (RNA) & Certified Nurse Aide (CNA) in the specific step-by-step process of providing restorative nursing care to residents in the nursing home or other long-term care settings. LPN's and RN's overseeing the Restorative Program may also benefit by attending as well.

The training program consists of a one-day seminar and Clinical Skills Demonstration sheets to be completed in the sponsoring nursing facility.

Make checks payable/mail to:

Care Providers Oklahoma - 1201 North Harvey Avenue - Oklahoma City, OK 73103

Clinical skills are to be observed by the facilities' therapists to include Physical Therapist, Occupational Therapist, and Speech Pathologist. **IT IS THE RESPONSIBILITY of the sponsoring nursing facility to make arrangements with rehab company/ therapist (OT, PT, SP) to provide the clinical demonstration for course completion.** Participants will be provided the clinical skills training list at the end of the class day.

At the completion of the entire training program, a successful participant will be awarded with a **Certificate of Training in Restorative Nursing.**

**Training Program Designed To:**

- Provide specific training for the RNA and the Restorative Nurse in the principles of physical, occupational and speech therapy applicable to a restorative nursing program in long-term care.
- Provide information about what a quality restorative nursing program should provide.
- Provide a step by step process that the trainee can use to provide restorative nursing care.
- Provide training in the medical record documentation necessary for a restorative nursing program.
- Provide information about restorative nursing and the survey process to improve survey results in restorative nursing.

Classroom instruction of the one-day training program consists of therapist who has experience working in nursing facilities across Oklahoma. Rehab companies will be responsible for conducting the clinical training in the nursing homes they individually serve.

**The following restorative activities will be covered in the seminar:**

- Passive / Active ROM
- Amputation / Prosthesis Care
- Splint / Brace Assistance
- Dressing / Grooming Training
- Eating / Swallowing Training
- Bed Mobility / Walking Training
- Transfer Training
- Communication Training
- Scheduled Toileting Program / Bladder Retraining Program

**Important Things to Bring:**

Participants should bring a sweater or light jacket (room temperatures are often difficult to control); pens and note paper; and wear casual, comfortable clothes.

**Participant Qualifications:**

Anyone interested in providing a quality restorative nursing program is welcome to register and attend the seminar. However, only participants that are CNA's or licensed nurses will be allowed to complete the entire training program and receive a certificate of training.
